Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 7, 8, 10, 12, 15, and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by newly cited U.S. Patent No. 6,315,210 to Kline. Kline in Fig. 3 clearly discloses the claimed invention, including multi-stage plenum chambers 112, 230 and 110, 232 for the hot and cold water inflows. The multi-stage chambers are arranged so that the water enters and exits each stage at positions axially spaced from each other.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 6, 13, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kline. Kline discloses the claimed invention except for the size and shape of the plenum chambers, and for the sizes and arrangements of the openings. All of these parameters are considered to be matters of obvious design choice to one of ordinary skill in the valve art.

5. Claims 5, 9, 11, and 16-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable

generic or linking claim. Election was made **without** traverse in the reply filed on September 14, 2004.

6. Applicant's arguments with respect to claims 1, 21, and 22 have been considered but are moot in view of the new grounds of rejection.
